PROFESSIONAL SUMMARY

Cloud Solutions Architect with **5+ years** of experience designing, reviewing, and optimizing cloud-native architectures across AWS, Google Cloud, and Azure. Strong background in **DevOps, SRE, and Infrastructure as Code (IaC)**, translating business requirements into secure, scalable, and cost-efficient systems. Proven expertise in **Kubernetes, Terraform, and observability**, supporting fintech and enterprise workloads under strict compliance requirements (e.g., **PCI DSS**). Key driver of measurable impact through **cost optimization, reliability improvements, and architectural standardization**.

WORK EXPERIENCE

Pertamina Marine Solutions - Jakarta, Indonesia

Expert DevOps Engineer & Software Engineer

Aug 2025 - Present

- Led cloud architecture optimization initiatives on **Microsoft Azure**, achieving a **51% infrastructure cost reduction** through right-sizing and design improvements, and leveraging Reserved Instances.
- Introduced **Terraform** as the standard Infrastructure as Code framework, improving deployment consistency and auditability.
- Managed the secure domain and TLS certificate lifecycle for production platforms.
- Implemented **AI-assisted development workflows** to improve code quality and reduce review turnaround time.
- Engineered and deployed a critical internal application utilizing **.Net 8, React, Azure OpenAI, and Azure Intelligence**. This solution implemented Retrieval-Augmented Generation (RAG) against internal policy documents, significantly boosting employee productivity and enhancing compliance with Do Good principles within an Indonesian State-Owned Enterprise.
- **Single-handedly** managed the end-to-end platform architecture and operations, reporting directly to the **Executive Director**.
- **Lead** 20+ outsourced vendor developers, enhancing **6 web applications**. Determined the tech stack, system architecture, and guided developers from different vendors to meet company standards.
- Served as **Technical Architect** and **Product Owner** for a multi-module enterprise platform supporting thousands of users, successfully improving platform uptime from **90% to 99%** by providing architectural guidance and implementing CI/CD best practices.
- Created and presented a comprehensive IT Initiative roadmap to the company's executive leadership. Proposed initiatives focused on cost reduction, manpower hour savings, and increased productivity, integrity, and accountability. Projected savings up to **USD \$50,000 per year** in cloud cost and cost avoidance, and saving **10,000 hours** of man-hours through automation.
- Introduced Service Desk to the company, improving productivity and communication within the service and support team. Established L1, L2, and L3 service escalation and SLA tracking, deploying the Zammad self-managed open-source service desk solution.
- Introduced distributed tracing to applications to decrease the mean time to recover (MTTR).

Xendit - Jakarta, Indonesia

Infrastructure Engineer

Feb 2022 – Aug 2023

- Blends full-stack development, DBA, DevOps, and performance engineering skills for a holistic approach to designing, optimizing, and maintaining highly scalable, reliable production systems.
- Cut monthly AWS expenditure by **USD 5,800** through meticulous service optimization, waste elimination, and rightsizing compute/database instances, preserving performance.
- Designed and maintained a library of battle-tested **Terraform modules** for critical, highly available data services (Amazon RDS, ElastiCache), eliminating 100% of provisioning toil. Acted as the internal Terraform SME.
- Expertly diagnosed and resolved complex networking issues in **Amazon EKS** using AWS Security Groups, Route Tables, and **Calico Network Policies**. Implemented AWS VPC Endpoints to bypass peering limits.

- Architected and led the **GitOps-driven deployment (ArgoCD)** of the Postgres Exporter on EKS, creating a **100% Highly Available** collection pipeline. Integrated end-to-end Logging, Monitoring, and Distributed Tracing pipelines using **Splunk and Datadog**.
- Maintained infrastructure within **PCI DSS** compliance. Directly calculated and validated key DR metrics (RTO/RPO) and contributed to the organization's enterprise-level **Multi-Region disaster recovery strategy**.
- Spearheaded regional migration efforts (AWS Oregon to Jakarta/Singapore), resulting in a **50% reduction in API latency** for regional users. **Change Data Capture (CDC) Implementation:** Completed a CDC Proof of Concept (POC) between PostgreSQL and ClickHouse using Kafka Connect for robust, near-real-time data synchronization.

Fulk Technology Group - Remote
Site Reliability Engineer

Feb 2024 - July 2025

- **Led the enterprise-wide transition** from AWS CloudFormation to modern, scalable **Terraform** for all cloud infrastructure (VPCs, EC2/ASG, RDS, Load Balancers), significantly increasing deployment speed and stability.
- Established a centralized, version-controlled **Terraform module registry**, accelerating feature development and enforcing security standards.
- Designed and maintained sophisticated **CI/CD pipelines** using **GitHub Actions**, drastically improving code deployment reliability and accelerating release velocity (e.g., blue/green deployments).
- Expertly executed complex, high-stakes **PostgreSQL schema and major version migrations** for mission-critical services, consistently achieving **zero downtime** using logical replication and blue/green strategies.
- Leveraged **Ansible** to architect a comprehensive, declarative system for configuration management, reducing operational toil.

EDUCATION

Bandung Institute of Technology – Bandung, Indonesia

- Bachelor of Engineering, Information Systems and Technology (GPA: 3.91/4.00)
- Best First Year Student of School of Electrical and Informatics Engineering (STEI) ITB class of 2019
- 1st Winner of ITB Online Hackathon Pra-Gemastik 14 and Gemastik 14 Finalist : Smart Device, Embedded System & IoT
- **IEEE Conference Paper:** Co-authored "*Reduced Size Meander Line-based 433MHz Printed Dipole Antenna for UAV Telemetry Application*" (ICRAMET, 2020).

CERTIFICATION

AWS Certified Cloud Practitioner	<i>Sep 2023 - Sep 2026</i>
AWS Certified Solutions Architect – Associate	<i>Jul 2022 - Jul 2025</i>
AWS Certified Developer – Associate	<i>Jul 2022 - Jul 2025</i>
AWS Certified SysOps Administrator – Associate	<i>Jul 2022 - Jul 2025</i>
Google Cloud Certified – Associate Cloud Engineer	<i>Aug 2022 - Aug 2025</i>
CompTIA Security+ ce Certification	<i>Feb 2023 - Feb 2026</i>
HashiCorp Certified: Terraform Associate (003)	<i>Sep 2023 - Sep 2025</i>

TECHNICAL EXPERTISE

Cloud Computing: Kubernetes, Service Mesh, Network Policy, Containerized Application, Terraform, Infrastructure as Code, CloudFormation, Distributed System, Logging, Monitoring, Distributed Tracing, AWS, GCP, Azure, Datadog, Splunk, Multi-Region DR, Docker

Database: PostgreSQL, MySQL, MongoDB, DynamoDB, Redis

Programming Language: Go, JavaScript, NodeJS, Typescript, Python, React, React Native, .NET

Soft Skills: Communication, Team Work, Interpersonal Communication

Languages: Fluent in Bahasa Indonesia; Conversational Proficiency in English
